Recipient: All Dealership Staff Using BOSSWeb  
Subject: BOSSWeb Accessibility Issue + Solution

Dear BRP Dealer,

The most recent Google Chrome update has enabled a feature that may create issues when logging onto BOSSWeb and accessing certain transactions.

We are working on a permanent solution. **In the meantime, here's what to do to continue your daily operations in BOSSWeb:**

- You can use another web browser such as Mozilla Firefox or Internet Explorer.
- If you want to keep using Google Chrome, copy and paste the following link in the search bar: <chrome://flags> and disable the "SameSite by default cookies" and "Cookies without SameSite must be secure" features.

● **SameSite by default cookies**

Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android

[#same-site-by-default-cookies](#)

Disabled ▼

● **Cookies without SameSite must be secure**

If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if "SameSite by default cookies" is also enabled. – Mac, Windows, Linux, Chrome OS, Android

If you have any other questions, please call the BOSSWeb technology support team

We thank you for your patience and understanding as we work to solve this technical issue.
