

September 26, 2008 Subject: **Can-Am™ DS 450™ New Clutch Parts**

No. **2009-9**

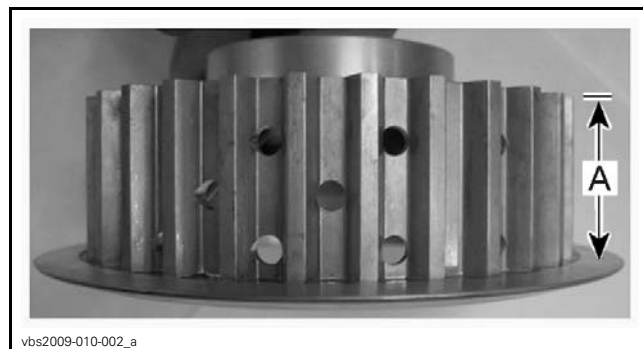

YEAR	MODEL	MODEL NUMBER	SERIAL NUMBER
2008	DS 450	All	All
2009	DS 450	All	All

NEW CLUTCH PARTS

There was a running change, starting from engine number M6748166, on the clutch hub and clutch cover on MY2009 DS 450.

New Clutch Hub

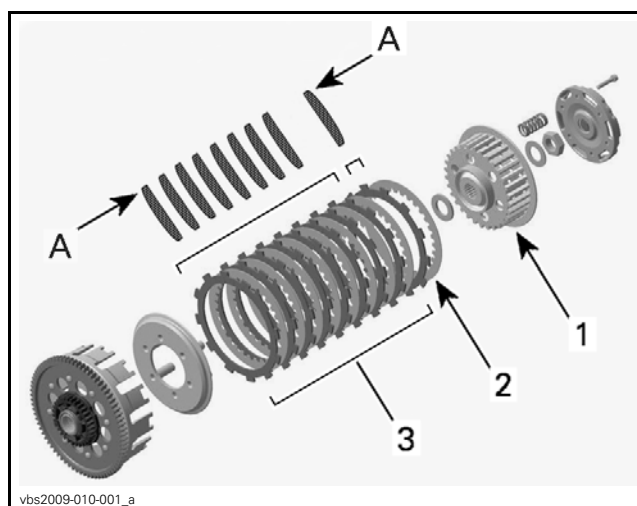

The new clutch hub has different machining and requires an extra clutch plate (9 instead of 8) that is seated against the clutch hub itself.

CLUTCH HUB

A. Increased dimension for the new clutch hub

The extra clutch plate is the same as the other clutch plates and is to be seated with the rounded edge toward the clutch hub. It is also recommended that the other clutch plates be inverted and installed toward the clutch drum.

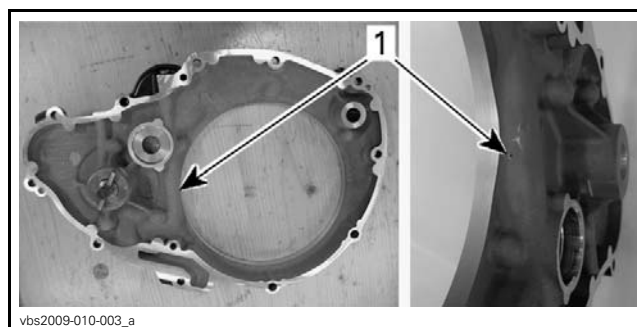

A. Rounded edge

1. New clutch hub
2. Additional clutch plate
3. Other clutch plates

New Clutch Cover

The new clutch cover has a small calibrated hole drilled into an oil passageway. This will allow oil to fog the inside of the clutch area.

CLUTCH COVER

1. Small calibrated hole

NEW PARTS NUMBER

DESCRIPTION	P/N
New Clutch Hub	420 259 873
New Clutch Cover	420 611 666
Additional Clutch Plate	420 259 910

INSTALLATION NOTE

These parts are interchangeable with one another, but it is recommended to use the new clutch hub and new clutch cover in conjunction with one another for better clutch performance.

Always refer to the appropriate *ATV SHOP MANUAL* for proper installation procedure.

When the old parts are out of stock, they will be replaced with the new parts. If the old hub is ordered and it is out of stock, the new hub will be shipped along with a clutch plate.
